SAVE AND HAVE It's National Thrift Day on February 3d-4th

As a nation, we are learning the lesson of Thrift and finding it well worth while. The annual celebration of National Thrift Day has played a large part in bringing about this new attitude. It has made Thrift easy to practice by providing a day when hundreds of thousands of people are thinking and acting Thrift.

"A new Thrift habit?" is the rule on February 3rd of each year for Thrift Day observance. The habit need not be the saving of actual money.

Thrift Day will next be celebrated on Monday, February 4th, 1918. It will be our first war Thrift Day and there is evidence that Americans in greater numbers than ever before will observe the day with thrifty actions. Thrift, indeed, is no mere service of self; it is service to the country—a form of patriotism in which every citizen can indulge.

STOP THE FARM LEAKS Every one knows what happens when water is put into a barrel that has stood empty in the sun for a while. The water leaks out between the staves. Many manufacturers hire men to study out ways of stopping such leaks in their business. It is said that a well-known automobile company offers a small fortune to any man who will save a few cents in the cost of building prominent parts of an auto. Just so in farming. The most successful farmer is the one who has the best organized business which is best adapted to conditions, and has the fewest "leaks." Every dairy farmer knows the Babcock test shows how much butter fat is in a cow's milk.

EAST OXFORD Mrs. Guy M. Trask and daughter of Portland spent the week end with Mr. Trask at J. P. Penley's.

Mrs. Emma B. White of Lisbon Falls was the week end guest of her father, P. J. Billings.

Edwin Sands and George Babineau were at Holborn, Sunday.

Gilman Penley of South Paris was at his brother's, J. P. Penley's, one day last week.

Truman Won Speedy Match

In the fastest main bout ever played off in town, Homer Truman, the Maine champion, won in straight falls from Jim Poulos of Manchester, N. H., at Norway Opera House, Thursday evening, Jan. 24. Truman secured the first fall with a half nelson and body scissors in fourteen and one-half minutes, the second while using a head scissors with half nelson in thirteen and one-half minutes. Poulos took severe punishment at the finish of the second round. Arthur Morris, the Norway Greek, defaulted to Omar King of Island Pond, Vt., in the semi-final after losing the first round in six and one-half minutes. The preliminary was won by "Wild Bill" Ledger in straight falls from Lester (Crepper) Lapham in five and four and one-half minutes.

Referee Fred (Cyclone) Gregg started the show promptly with a pair of Norway bantams as the preliminary offering. They were told to go after it and hustle they did with "Wild Bill" the stronger kid. Crepper Lapham made his first appearance on the mat and after shaking off an attack of stage fright got into Bill in a manner that looked good. Young Ledger's previous experience was in his favor and after a busy session won the match.

Manager Stairs had trouble to find an opponent for "Speedy" King. Charlie Howe of North Norway, who had been matched failed to appear. Arthur, the Norway Greek, volunteered to make his initial bow as a wrestler with a best two in three, catch-as-catch-can agreement. This will went six and one-half minutes with everything in King's favor. When the second round was called the Greek vanished feeling certain the mat was no place for him. The decision was in favor of King by this default. King offered to finish the match with any 150 pound man in the hall, but was not taken.

All admit the main bout that followed was some big classy wrestling show. John Kalonis who sent Jim Poulos, the Manchester Greek as a strong antagonist for Truman, picked a fast man, in fact the quickest and ablest performer who has appeared before the Norway sports. He is the only wrestler beside Sherburn who made any get away from the powerful scissors for which Truman is famous and dreaded. As a scientific and powerful chap with lightning speed there is no question, giving the Maine champion plenty of work and a chance to show considerable stuff not usually necessary. Conditions of match were best two in three, strangle and toe holds barred, catch-as-catch-can.

At the outside Truman weighed 173 1/2 pounds and Poulos 162 1/2. They opened with a dash and no preliminary sizing up killed a single minute. Both were able to block freely and break easily any hold passed over. The work was largely open as they covered up with speedy leg action, making the show spectacular. During the clinches nobody stalled, for the work proved rapid with both in dangerous places until a neat break-away relieved the tension. Truman's ability to meet rapid work and clear for a counter attack came as a surprise to many. All are familiar with his strength, but keen ring generalship and agility was something new as the champion has had in the past an opportunity to throw out but few trumps. The famous scissor made small impression during the early stages for Poulos proved a wizard in snapping out of the body and head squeeze that has trapped many good men. He also neatly blocked that game until Truman warmed up and applied the emergency brakes, especially in the second round. It was this powerful grip from which the Manchester athlete could not crawl that gave Truman the match after Poulos took punishment for two minutes before giving up. He was helped by his feet by the referee and when able to speak frankly admitted that he was trimmed.

Frederick M. Davis lived things up during intermission with latest musical hits on the piano. The no smoking order was carried out to the letter and ringside spectators quiet as sleepy kittens. Orderly demonstrations were frequent but carried on in a safe and sane way.

BREAD MADE WITH WATER OF OCEAN

French chemists are advocating the use of sea water in the making of bread. This would not only save the transportation of salt, it is alleged, but would add materially to the healthy properties of the bread, owing to the fact that sea water contains, besides salt, a valuable percentage of magnesium and calcium.
Ocean water is already being used, and the bread has gained a considerable reputation as a diet in various complaints.

REGISTRATION OF ALIEN ENEMIES

Persons required to register should understand that in so doing they are giving proof of their peaceful dispositions and of their intention to conform to the laws of the United States.

Every registrant should read carefully the form of registration affidavit handed to him and ask the registration officer for explanation on all points not clear to him before attempting to fill out the blanks. Registration officers are instructed to give registrants all possible aid in the way of explanation and advice.

Each registrant is required to furnish four unmounted photographs of himself, not larger than 3 by 3 inches in size, on thin paper, with light background. All four photographs should be signed by the registrant across the face of the photographs, so as not to obscure the features, if the applicant is able to write.

Three blank forms of registration affidavit must be completely filled out by the registrant or his representative (with the exception of the blanks indicated to be filled out by the registration officer and the description of the registrant and the placing of finger prints on the blank) and must be produced by the registrant personally to the registration officer and be signed and sworn to by the registrant in the presence of and before the registration officer, who will fill in the description of the registrant and supervise the fixing of the finger prints and the attaching of the photographs. If the registrant can not write he must make his mark in the signature space and affix his left thumb print in the space provided opposite the signature space.

The finger printing is a method of identification and follows the practice observed in the military and the naval service of the United States.

The registrant is hereby informed that he must again present himself before the registration officer who took his oath after 10 days, but before 15 days from the last day fixed for registration in his registration district to obtain a registration card, upon which he must sign his name, or make his mark, and place his left thumb print in the presence of the registration officers.

JOURNEY OF JOSEPH ANDREWS CONTINUED

Dear Advertiser:

A neat little twenty page folder given me by my friend, Russ Hamblin, gives much useful information to the tourist about visiting Bridgton. From it I learned that within a radius of ten miles, there are over a hundred different bodies of water connecting with each other, of which easy carrying distance, and that within the limits of the town are listed twenty-one hotels and boarding houses. Tourists from the south, the great middle west and the Pacific slope, who in his youthful days journeyed from the bleak hills of the north to seek fame, fortune and a home among the orange groves of Florida and California, the lumber camps of Michigan, Oregon and Washington, or upon the broad rich prairies of the Dakotas, Iowa, Nebraska or Kansas, may return and expend a little of their well earned wealth for the peace, health and pleasure that is enjoyed by all who patronize this, and many other of Maine's popular resorts during the long hot summer and early autumn days.

September 28th I bade my Bridgton friends goodbye and boarding the little Jumbo train enjoyed the novelty of my first ride on a narrow gauge railroad, to Bridgton Junction sixteen miles away, where I boarded the Main Central train, and was soon in Portland, where I spent a very pleasant day and night at the home of J. A. Fowler, 3 Cumberland avenue. Mr. Fowler is a veteran member of the Portland Fire Department and will soon be retired on a pension. His wife is a sister of Fred Andrews' wife, nee Mattie Jameson, whom I visited at Smithland, Iowa, last spring, and who wished me to visit her sister in Portland. I spent a portion of the day in sight seeing, went to the western Promenade and Park, then took a walk down Congress street past the Soldiers' monument, and the fellow statue, to Union Station, then took a car back to my starting point. I spent a good half hour in one of Portland's oldest and most historic cemeteries. His story records that on Sept. 5th, 1813, the American brig "Enterprise" captured off the Maine coast, the British brig, "Boxer" and that both commanders were killed in the action and buried in a Portland cemetery side by side. I asked a workman if he could point me out the spot where they were buried, which he kindly did. There are three monuments side by side, built of brick, the length and width of the graves, and about three feet high, and on each a slate slab with an inscription. The first, that of Capt. Burrows of the Enterprise, the next that of Capt. Blyth of the Boxer, and the other I think that of another command. I was killed in the action. The inscription on Capt. Blyth's slab struck me as peculiar and pathetic, and I copied it. It is as follows: "In memory of Capt. Samuel Blyth, late Commander of His Britannic Majesty's brig, Boxer. He nobly fell on the 5th day of Sept. 1813 in action with the U. S. brig, Enterprise. In life honorable, in death glorious. His country will long deplore one of her bravest sons. His friends long lament one of the best of men. Aged 29. The surviving officers of his crew offer this brief tribute of admiration and respect."

The next morning I bade my new found friends goodbye and took the early morning train to Boston, where I transferred from the North to the South station, where at 1 p. m. boarded a train bound for Hartford, Conn., where I arrived at due time, and taking a street car according to my written instructions, was soon at the home of Mr. and Mrs. Kennedy, 102 Sargent street, where according to my travelling schedule I was to visit from Friday until the next Monday noon. Mrs. Kennedy, nee Mary H. Pottle, is the daughter of my life long friend, A. M. Pottle of Lowell. I met her once when she was a little girl in Lowell, when as a brave little lady she was keeping house for her father, soon after her mother's death, and later in San Francisco, at the home of her aunt, Mrs. Henry Stearns, where she lived for a number of years. Mr. and Mrs. Kennedy have a very pleasant home, and they have a bright eyed handsome baby boy to cheer them on their way.

Hartford has a population of about 100,000 and is one of the oldest and most noted cities in the United States. I visited the magnificent State Capitol building, the wonderful Morgan and Colt art display, in the fine Colt Memorial building the famous old city hall, used as a state house from 1796 until 1879 and in which the historic Hartford Convention was held in 1814, when the New England states came near sinking themselves out of the union. I viewed the grand Soldiers' Memorial Arch, the great office buildings of the Aetna and a score of other great insurance companies, and many other fine structures by far too numerous to mention. But next to the old State house, the most interesting place that I visited was the First Church of Christ, founded in 1632. I think I must have spent an hour in the church, and in the large over crowded cemetery adjoining. The church is large and grand, in every way well suited for a city of Hartford's rank, but everything was in Colonial style, high backed pews, with doors fastening on the inside, singers' gallery and pulpit with sounding-board. Should I ever chance to visit Hartford again and be there over Sunday, I should surely want to attend that same old church as a reminder of my boyhood days.

On Sunday Mr. Kennedy was left in charge of the baby and the house, and Mrs. Kennedy took me for a three mile hike to one of the far off suburbs of the city, where they own several city lots, upon one of which they expect to build in the spring. This part of the city is growing fast. The street cars and paved streets are already there and many fine bungalows and residences are being built. But a few blocks away, along the river bottom, is a fine large park or which are golf links and other amusement grounds, which are intended to make of the park one of the choice play grounds of the city. We returned home on the street cars, well pleased with our short outing. I spent a part of the next forenoon sight seeing around the city and in the afternoon bade my friends goodbye and boarded a N. Y. and N. H. train for Mamaronock, N. Y., a little over one hundred miles, where I arrived all right and was met by my old friend and kinsman, John A. Fitch. He and all his father's family lived for a number of years near Hiram, S. D. He is a nephew of Mrs. Sarah Berry of South Bridgton, and it was with him she visited when on her way to California two years ago, of which I wrote in one of my former letters. Mr. Fitch owns a fine home and his family consists of an accomplished, sensible wife and two sweet little daughters. The city has a population of about 4000 and being only twenty miles from New York City, is the home of a large

number of men and women, who find employment in the city and make the trip to town each morning, returning home each evening. Mr. Fitch is on the editorial staff of the "Survey," a weekly magazine published in the city.

Tuesday morning I went with him to the Grand Central Terminal Park avenue and 42 Street, New York City, where we separated for the day. He went to his office, and I took an elevated train to Central park. This was my third visit to this famous park. First in 1871, when it was far out in the suburbs and just beginning to take form, of which I shall write later. My second visit was in the fall of 1891, when with my daughter we had to wait nearly all day for our train going west, and spent a part of the day in Central Park, then as now in the center of the city and surrounded on every side by great business and residential blocks. At that time we found the wild animal show interesting, especially the two large Hippopotami, and a baby Hippo, a very large elephant and a small toothless little elephant, who seemed to draw the crowd, and whose picture was being painted by an artist. We chanced to be there when they fed the animals, and it was interesting to see the Hippo's eat. The keeper had what looked like a big tobacco bucket filled with wet bran in which was a large wooden paddle. The big fellows crawled up on the sloping end of the tank and held their jaws wide open while the keeper shoveled in the brand, a paddle full first to one then to the other. The great is over two tons long and contains over 800 acres. I walked the entire length and of course visited the animals. The two old Hoppes and a half grown one was there and the big elephant, but the little Jumbo I did not find. I walked back to my starting point in the park, then down Fifth street about twenty blocks to the Terminal station, where I took a subway train that left me near the big Brooklyn bridge. Here I visited a lunch counter and partook of my usual fifteen cent lunch, then walked the entire length of the bridge to Brooklyn, walked down a cross street about a block, and walked back on the great Manhattan bridge to New York City.

I then wandered for a mile or so along the water front, visited the famous Fulton Fish Market, Battery Park, Castle Garden, and the great iron structure, but did not turn into an aquarium which is wonderfully interesting and instructive. From there I walked up the street a few blocks to City Hall Park, where I rested my weary bones for a little while, then went to the Subway and took a car to the 42nd street station, where I met Mr. Fitch according to appointment. We returned to the quiet little city with the big thing that had been offered to announce. My expenses for the day was lunch 15 and car fare 15 cents.

Wednesday I again went to the city with John. This time I took a subway car for the water front, where many small excursion boats have their headquarters. My first trip was to Ellis Island, a government ferryboat runs every 40 minutes between the battery and the island. Since the big war started there has not been much doing in the way immigration and everything was very quiet. We had a good chance to inspect the buildings and see for ourselves the splendid provision made to care for the great influx to our shores in normal times. Returning to the Battery I next boarded an excursion boat that makes a trip to Bedloe's Island every half hour. The boat stands the great Statue of Liberty. This is a trip well worth while. (Continued from page 1)

Mr. Elliott is watching nights on the Trunk bridge, taking the place of Jewell, who fell and was severely injured January 18.

State Court was again postponed Tuesday until Friday owing to the illness of Judge A. E. Herrick of Bethel, who has been having a severe cold.

Paris water supply has just received the "O. K." by the State Laboratory.

A drama with a touch of comedy will be given by the high school in the Grange hall this Thursday night. Mrs. I. E. Andrews has been the cost and a fine presentation is expected. Shaw's orchestra will furnish the music for the acts and for a short play.

ABBOTT'S MILLS

Thompson killed a nice large black bear last week. Lin Cole did the work for him.

The bear could not go with the milk, Frank Thompson says.

Man Back is able to go to the barn and able to do any chores yet.

Mr. Abbott is hauling wood from the lot.

Mr. Thompson goes to South Paris on Friday to be examined.

Mr. Gustav Delano is sick with a cold.

Mr. Back is hauling wood to the barn a few days, takes a lot of wood and weather and takes a lot of time to get snow and break roads, the snow is very deep around here.

GIVE US THE TRUTH

American public is entirely unable to form an opinion as to what conditions are really prevailing in Germany. The information factories are running over-land in Amsterdam and in Switzerland, and come nearly all the dispatches from the north German, political, social and economic affairs.

The dispatch from Amsterdam states Germany is full of light, fairly well and stronger than ever. Another dispatch from the same paper on the other page says that Germany is hungry, and the war, and may collapse at any time.

What is the truth about this? People are asking their fellows, and are speculating mentally in an effort to get the truth but with no success whatever.

There must be men in England know. There must be many soldiers in Switzerland who know exact conditions exist in Germany and Austria.

The anxious truth seeking in the United States will certainly appreciate it if Mr. Creel and the censor will cut out the manufacture of news wares of the day and give something dependable. Personally we are not sure that conditions in Germany are nearly unbearable that the masses will revolt if they dared. But "men" believe what they wish to believe and the fear is always with us.

Our hopes are leading us astray. If truth is known let it be divulged.—Hollan Journal.

The farm buildings situated on the road between what is known as the Island Pond road, and the road beyond the twin bridges, on the Harrison road, were burned to the ground Friday night at 11 o'clock, with the contents. Elliot Kimball lives on the place. He formerly lived on the Crosby farm on Crockett Ridge. Mr. Kimball and his son were alone for the night, and the cats woke them up, crying, and he got up to let them out, and discovered the barn all on fire. He awoke the boy and they got out without saving anything. The farm was known as the Amnis place.

Norway Won Game From Paris
Norway High won in basket ball over her rival Paris High, at Norway Opera House Friday evening, the result being 30 to 11. The playing was fast and clean with comparatively little fouling. Both teams were supported by a bunch of royal school rooters that furnished cheers and music during the play.

Klain secured the first floor goal in two minutes and the Norway team had an eight point lead before Paris found the basket. Norway rushed matters during the first half and had the ball in Paris territory a greater part of the time. Scoring 9 floor goals from Paris. In the second period the Paris quintet got down to business and played a stronger game, showing better defense and more inclination to pass cleanly. Norway was able to get only 3 baskets from the floor, although many close shots were taken, but 2 goals from 5 free throws. Porter secured one from 4 chances. This also had hard luck finding the ring and should have scored a larger percentage of shots that just missed.

Fouls called on Norway 7, on Paris 11. Referee, A. G. Parker. Time keeper, P. H. Nevers. Scorers, Sloan and Merrill. Twenty minute periods.

The game was clean with little attempt to rough-house. A warning from the referee had a quieting effect and but few penalties given, only 7 fouls being called on the home team and 10 on the visitors. Porter, Curtis and McGinley for Paris, were the fortunate score makers for Paris while Descoeaux, Barker, Stone and Klain did effective shooting for Norway.

Both teams had the loyal and enthusiastic support of a large, well organized cheering section. About seventy-five Norway High Students occupied the stage, giving school cheers and songs to encourage their team. Paris was represented by at least fifty students in the balcony section who were on the job at all times. The best feeling prevailed between the rival squads and considerable applause was exchanged.

A second school game scheduled for intermission was not played. Bridgton sent over an independent team of husky sals which the Norway High Seconds could not play. A picked up quintet offered their services but the management decided to call the affair off.

A large number remained to the dance which followed, music being furnished by Howard Shaw and Roger Sloane.

Fuel Edict Observed in Norway
Following out the program as laid down by the Fuel Administrator Garfield at Washington, the Norway industries not making their own fuel for heat and power closed shop until Wednesday morning. The Norway Knitting Co. and Norway Shoe Co. dropped everything Thursday night. Friday morning work was suspended at the Norway Turning Co.

A general holiday was observed Monday with the stores, barber shops, offices, general business places closed. Grocers closed on business until noon and drug stores remained open throughout the day. Probably some fuel was saved locally by this short notice halt in our activities.

Sergt. Dyer's Christmas Letter
Sergt. Alfred J. Dyer, Co. D, 103rd U. S. Infantry, A. E. F. in France, remembered the Advertiser with the following Christmas letter dated Dec. 26, and received this week.

"I am writing you a few lines and hope it will find you folks in good health. I am glad to say that we are all in good trim."

"I must tell you about our Christmas dinner. We had roast turkey, mashed potatoes, mince pies, apples, nuts and figs. I tell you it was some feed, thoroughly enjoyed by every one of us. Following this Lieut. Swett passed us out a surprise in the form of bags of candy, chocolate, cocoa, tobacco, cigarettes, toilet articles and puzzles. These were sent by the South Paris Service League."

"We have our new Y. M. C. A. hut completed and opened last Saturday night (Dec. 22). It is a big one and will care for more than 2,000 soldiers. The Association is doing good work over here and can be found right up to the front line trenches. Don't know what a man would do if not for the Y. M. C. A. conveniences. We come in wet and tired there is a chance to dry one's shoes and clothes, also a good cup of hot coffee. Plenty of writing material and a cozy place to smoke are things which make life worth living. It is very cold here now with snow on the ground."

Horne L. Cleveland has moved his family into Geo. H. Bennett's house on Whitman street. They will remain until spring and Mr. Bennett will make his home there.

Mills, loaded with boxes from Harry Brown's mill, North Waterford, took fright at a snow plow, and the boxes were distributed in all directions. Bilton's grocery team came near being involved by the runaway, but managed to make an escape. Quite a quantity of boxes were broken but no damage to the horses or team.

Fuel and Power in Plenty.
Maine has plenty of fine peat bogs wide spread throughout the State. This peat can be used for fuel if properly prepared.

We suggest that the work be pushed forward in the spring. Also the Maine water power be utilized for manufacturing purposes. A large part of the state is forest land covered with wood. Maine has fuel and power in plenty and if we are short in either it is our own shiftlessness.

Don't blame the government.

NIGHT LAMP
Mothers who have timid little ones will appreciate the new night lamp. It consists of a small piece of wood which acts as a float. Through it passes a tiny wick. An ordinary cheap kerosene lamp is added with water and then a little oil is added—cottonseed, olive oil, kerosene, or in fact any kind of 1-2 gallon water. Soak goods in this mixture for a few hours.
For lavender, use 1 tablespoon sugar of lead to 1 gallon of water. Soak the goods a few hours.
Using the proper "fixer" for the proper color will give excellent results.

SOUTH PARIS

The senior drama by P. H. S., entitled "Home Tree" will be presented at the Grange Hall, this Thursday evening. Music will be furnished by Shaw's orchestra.

Oxford County Fair Dates Set

The dates of the fair are fixed as Sept. 10, 11 and 12. This is the week before the state fair at Lewiston as arranged for this year.

The Agricultural Society has purchased the Dr. Bedard place across from the Norway, including an acre and a half field which adjoins the fair grounds. This field will be added to the grounds.

Generous Gifts From Mrs. True
A number of bequests in the will of Mrs. Helen M. True, who died in New Gloucester on the 9th, are of interest here. The will was filed for probate in the Cumberland Probate Court. Hon. James B. Wright of South Paris is named as executor.

To her sister, Mrs. George W. Haskell of New Gloucester, with whom she has made her home since Mr. True's death, Mrs. True leaves the sum of \$5,000. Also in a codicil added recently she gives Mr. Haskell \$1,000.

To her other sister, Mrs. Norris of Port Clyde, she leaves the sum of \$5,000 increased in the codicil by \$2,000, in trust to the executor, only the income of it to be used. At the death of her sister the larger part of this legacy is to be distributed for various charitable purposes.

To Mrs. Charlotte E. Howe of South Paris the sum of \$100 is given, and there is also a bequest of \$50 to Loan P. Stevens of South Paris, who has died since the will was drawn.

To the Congregational church of South Paris the sum of \$1,000 is given, to be known as the D. N. True fund, only the income of which is to be used. Also from her personal funds she leaves to the church the sum of \$500 to be used as the church sees fit.

There are a few bequests of smaller amounts. The Girls' Home at Belfast will receive \$100, the Maine Bible society \$100 and the Baptist society at Port Clyde \$200 upon the death of Ann Eliza Seavey, a sister of the testatrix and one of the beneficiaries named in the will.

Of the residue there is left to the town of Paris a sum not exceeding \$3,000, for a fund the income of which is to be used for the relief of people temporarily in hard financial circumstances, not paupers, as the Ocker and Bray funds, now in possession of the town, are administered.

Mr. and Mrs. Lewis Clark who secured government positions at Washington, D. C. several weeks ago, are now comfortably settled after experiencing some trouble finding accommodations at reasonable rates. Mr. Clark has employment in the purchasing department office and Mrs. Clark has a position in the Fuel Administration Building. They report unusually cold weather for that section of the country, but the cold there being more noticeable than a much lower temperature up here in Oxford County.

Fourteen or more box cars loaded with wheat in an east bound freight jumped the track at Jackson's crossing about 10:30 P. M. Friday night. The train jumped without getting derailed and a little damage resulted. A wrecking crew soon had the cars back and the line clear. A broken rail caused the mix-up.

Mrs. Kate S. Linder of Mankato, Minn., who is stopping for the present with her sister, Mrs. Cora S. Briggs, received a letter from her son, Leo S. Linder, who enlisted in Company F, 7th Infantry at Detroit, Mich., in June, stating he had just received his birthday and Christmas boxes, the contents of which pleased him very much, especially the scarf, sweater, socks and helmet, for which he expressed grateful thanks as the weather was very cold, with deep snow which is unusual in that climate. Mr. Linder was transferred from Gettysburg, Pa., to Camp Green, Charlotte, N. C., Company C 88th Machine Gun Battalion, where he was promoted to corporal. Before enlisting in June he visited his mother and other relatives here at South Paris.

SOME THINGS SAID OF AND BY NORWAY'S DON C. SEITZ

Don C. Seitz has just completed a 300,000 word work on the Wyandots, the most ambitious history of an Indian tribe since Morgan wrote "The League of the Iroquois." It embraces the detailed history of the tribes, contact with the white settlers, as well as accounts of its ethnography, customs, laws and habits.

He is at work on the life of the late Joseph Pulitzer, which is within sight of completion and is well underway on a life of the Confederate general, Baxton Bragg.

Mr. Seitz has written eleven books in the last ten years of his life with widely dissimilar subjects as Japan, the Mediterranean, Whistler, the Buccaneers, John Paul Jones.

Mr. Seitz sheds new light upon John Paul Jones, though there are already upward of 1,000 publications in various forms on this interesting naval adventurer. His book "Paul Jones, His Exploits in English Seas during 1775-1780" contains hitherto unpublished statements.

They concern the sea battles of Jones, together with a very extensive bibliography. This previously unexplored literary field has made it possible for Mr. Seitz to add to history numerous incidents of unquestioned value, for, as will be admitted by all searchers for truth, the chronicle of passing events in the daily press frequently contain many true facts that are not found elsewhere.

The English newspaper accounts of the first appearance of Jones as American commander of the Ranger privateer, off the town of Whitby, are thrilling in the extreme. One story of the visit is told by the Cumberland Chronicle Extraordinary—how the town was alarmed by visiting sailors from the Ranger, "who proceeded to a public house and drank much liquor, then set fire to and greatly damaged a collier, but the fire was extinguished; who afterwards made off for the Scots' shore."

When and how does he write? From half-past eight to half-past five o'clock every day Don C. Seitz is the manager of the New York World and the Evening World, one of the keepest, most practical newspaper executives in the country. During that portion of the day he gives himself entirely to the innumerable problems and questions arising in a great publishing establishment. But so soon as he has passed out through the revolving door of the Pulitzer Building the cares of journalism are left behind. Mr. Seitz enters a new world, a world totally different from that which had occupied his energies since early morning. On the trolley to Brooklyn or the train to his country place at Cos Cob, he dreams and scribbles, looking forward with anticipation to the hours after dinner when he can shut himself up in his library and indulge in the avocation that he enjoys almost as much as his serious occupation.

What does he dream of? What does he write about? Well, it depends upon the day. His recreation has been taking previously. Very likely it is phantasies. Desperate, cruel, baggy trousers, red-turbaned picaresques. Or it may be Indians only Mr. Seitz thinks of them in the same way as the small boy, who mutters the word "Injuns" in a subdued voice, with labored breath and round eyes. Or it may be of some great adventure of the past or present, some deed of reckless, heedless bravery, or perhaps, the life-story of one of those misunderstood personalities with whom history abounds.

Mr. Seitz says:
"You never know what you may find in the most unlikely sources," in describing his methods. In the course of collecting material for my Wyandot book I picked up one of those typical Chicago subscription editions of sloppily written biographies of frontier adventures—the sort of thing that never contains any original material. I don't know why I ever bought it, and yet in glancing through it I discovered the correct name for a personage figuring in my book whom I had been compelled to guess a name for.

"Again, in the course of working up my bibliography of 'Adventure' I came across a reference to a pamphlet issued by Frederick the Great on English privateering during the Seven Years' War. It was published in English and printed at Frederick's own press in Berlin, an early example of German propaganda. Well, I had the Imperial Library in Berlin searched without avail; the authorities there doubted if there was such a publication. But I kept on hunting for it, and six months later I obtained it through a book-dealer in Leeds for six shillings."

"Another experience of this kind I had in connection with hunting up local color for my Wyandot book. I wanted to find out just how the Indians of the Northwestern Confederation had declared war on us. After searching a long time without success, I came across a Philadelphia catalogue advertising for sale a number of copies of an early magazine, which contained among other things the account of the visit paid by certain Quakers to the Indians at this time. I sent for these magazines and obtained exactly the color I required."

"In collecting material for a life of Braxton Bragg I was fortunate enough in the same way to come across in a Western town a bundle of letters written by Bragg and by friends of his. I have an extensive interest in Bragg's life, through the fact that my people of the older generation out in Ohio belonged to the Middle Western regiments that fought against him. Besides that, I was named for Don Carlos Buell, Bragg's great opponent. And for another thing, there is a peculiar fascination in the life story of Bragg, morose, sullen in temperament, but one of the master minds of the Civil War. His Perryville campaign was a classic, and yet justice has never been done to him, largely because the leaders on his own side, except Jefferson Davis, did not like him. I think he has more claim to mention in history than any other man of the war."

"Give them a little more grape, Captain Bragg."

"Some day I hope to write a life of Artemus Ward, but I am waiting until I can obtain a collection of his letters which is in the possession of an old lady in Boston, who refuses to part with it. Her husband was Artemus's advance agent and I have heard these letters are fuller than anything else he ever wrote, material about him, it could be completed in about three months. I have written it with the design of bringing out the drama of Mr. Pulitzer's remark of his career and the really great aspects of his character, showing the tremendous influence he had on modern journalism."

It will be perceived from this account that Mr. Seitz is not one of those "tired

WEST PARIS

Mrs. Francis Emmons were brought here Friday from Portland for the funeral and interment. Mrs. Emmons was not as well as usual when she was here during the summer, but remained about the same until about a week before her death, when she was taken suddenly worse and died at the age of 79. She lived with her daughter, Bertha, but spent the summer months here at her old home.

Mrs. Emmons was the widow of the late Israel F. Emmons and for nearly 30 years resided here and was in business in the store now occupied by George Devine. The house adjacent to it they also owned and into which upon retiring from business they moved. This Mrs. Emmons kept until last fall when she sold to Dr. Staples.

Mrs. Emmons was twice married, her first husband being Mr. Hayes, by whom she had two children, Alice, who died in childhood, and Austin Hayes who died a few years ago. A grandson, Karl S. Hayes, who has always made his home with his grandparents, survives. By her second marriage she had one daughter, Bertha, mentioned above.

Mrs. Emmons was an attendant of the M. E. church, a member of the W. C. T. U. and the order of Rebekahs.

The funeral was held Friday afternoon in the M. E. church, Rev. L. W. Grundy officiating. Two familiar hymns were sung. The Rebekahs attended in a body and used their funeral service. Mrs. F. S. Farnum singing the service ode as a solo. It was a particular wish of the deceased some time since that Mrs. Farnum should sing at her funeral. The casket was a beautiful gray couch and the flowers were very pretty.

Death of Herbert Gardner. The whole village was shocked last Sunday morning to hear of the awful accident and death of Herbert Gardner. A few weeks ago he went onto the road breaking and Sunday morning about seven o'clock as he reached Percy, N. H., he got off to receive orders and was getting on again while the train was in motion and it is supposed that he slipped on some ice and fell under the train that ran over him.

Herbert was the son of Mr. and Mrs. W. W. Gardner and was born Sept. 29, 1898. Beside his parents he also leaves two sisters, Edith and Ethelwyn and a brother, George. He was a member of the graduating class W. P. H. S., of 1918 and left school during the fall term to help his father, who is station agent and a few weeks ago went onto the road.

He was a general favorite among the young people and a valuable member of the High school baseball team, who were named "Cubs."

The funeral was held Tuesday afternoon at two o'clock. Rev. L. W. Grundy officiating using the Episcopal service. Four young ladies from the high school Laura Emery, Mabel Allen, Edith Stevens and Margie McAllister sang three selections very sweetly, "Sometime We'll Understand," "Nearer My God to Thee" and "Safe in the Arms of Jesus." Four young men, also from the school, Herbert Hill, Frank Packard, Carl Egan and Ed Bacon, were pall bearers.

The high school band, in a body with their principal, Miss Wall. The flowers were most beautiful and were as follows:

Pillow with "son and brother"—The family. Basket, "W. H. S."—Senior Class. Crescent—Base Ball team.

Large harp—Village friends.

Carnations and roses—Diana J. Wall, P. H. Stevens and piano—Elsie Coburn, Crystal N. H.

Carnations—Mrs. and Mrs. Simpkins, South Paris.

Carnations—E. W. Penley and Alice Spray—A. M. and Harlan Andrews.

Hyacinths—Egworth League.

Glazed pinks—M. E. Sunday school.

White pinks—Church friends.

The foregoing list bespeaks the high esteem in which he was held. Special mention must be made of the size and value of the large harp, which was contributed by village friends to the amount of \$30.00. The harp was four or five feet high, made of most beautiful combinations. A part of the frame work was solid red carnations, the rest of roses, light pinks and other flowers, the strings were of purple and the pedestal roses and ferns. The other set pieces were very pretty, also the bouquets. Much sympathy is expressed for the bereaved family.

Fred E. Reed

The remains of Fred E. Reed were brought here Friday and placed in the tomb. Mr. Reed, who has been working for Elmer B. Davis in Norway, was about ten years, met his death by hanging. No cause is known except despondency. He was a man of good principles and reliable. He leaves a sister, Mrs. Willard Cobb of Peru, formerly of West Paris. She and her husband came to the funeral services. The remains were held at the tomb, Rev. L. W. Grundy having one hour to make them both at the assigned time. Mr. Reed must have been in the neighborhood of sixty years old.

Took Cold Plunge

A pair of horses, one belonging to Ellsworth Curtis, the other to Gerald Swift, and driven by Lendall Yates while after a load of ice about half a mile above the village, broke through and went under the ice, remaining there about fifteen minutes. They were quickly freed from the sleds and their heads kept out to their assistance and pulled them out. They were given proper and immediate care so that they were not harmed by their sudden cold bath.

BE YOURSELF

One reason why so many girls and boys, men and women, too, are uninteresting, is because they try so hard to be like somebody else rather than to be content to remain himself or herself in life. In nature, you don't see an oak posing as a willow, or a black duck as a yellow leg, or a horse as a cow, or a lily as a rose, or a lilac as a peony or a dog as a cat. Be just natural and you'll be all right.

Also it's safe to gamble that the price of garbage cans will not be boosted on account of the unusual demand.

An obsolete song: "Woodman, Spare That Tree."
